

Support Capabilities

Bomac provides you with world-class after sale support on your drive and control systems through our Parts and Service organization. Parts and Service is responsible for the following services on several major brands of AC and DC drive systems initially provided by Harland Simon CSI/Electro-Flyte and Bomac Drive and Control Systems:

- Field modifications
- System start-up
- Emergency on-site support
- Emergency phone support
- Hardware and system training

- PLC and HMI support
- System testing of Bomac engineered drive systems

The primary manufacturers supported by the service organization are:

- SSD Drives (formerly Eurotherm)
- Siemens
- General Electric (AV/DV family)
- Electro-Flyte
- Harland Simon Control Systems Inc.
- ABB (PAD series)
- Amicon drives

In addition, Bomac can support your organization through spare parts and parts repair capabilities. Bomac Parts

Bomac Board Manufacture and Repair

and Service provides new parts and performs repairs for the manufacturers named above as well as the Robicon ID2010.

Whether your requirements are a full system start-up or a parts repair or exchange, you can rely on Bomac for your service and support needs.
