

Let BOMAC ease your cyclic demand for Control Panel production needs. Our staff has complete capabilities for assisting you in meeting your fabrication requirements. Utilizing BOMAC decreases your need for upsizing/downsizing during peak and off peak production times.

### Panel examples include:

- Machine Control Panels
- Process Control Panels
- Motor Control Panels
- Instrumentation Control Panels

Motor Starter Panel

### Design

- Instrumentation
- Electrical
- Pneumatic
- Wiring
- Hazardous Area
- NEC / NFPA
- HMI / GUI
- Software Development (Control, GUI / Interface, Data Collection, Recipe Management)

### Manufacturing

- Electrical Control / Instrumentation panel fabrication per customer specification
- Electrical Control / Instrumentation panel fabrication per BOMAC design
- Process Piping & Tubing: Copper - Stainless - Plastic
- Refrigerant Piping: Copper-Stainless

Pneumatic/Electrical Control Panel

### Testing

- Documented
- Certification
- Calibration
- UL/C-UL

Machine Control Panel

### Commissioning

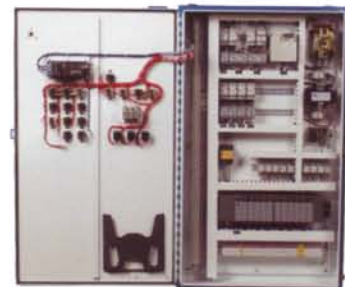

- Installation
- Startup and Debug
- Training

Control Panel w/HMI

### Full Service Support

- Project Management
- Engineering
- Documentation
- Fabrication
- Offline Testing
- Installation & Startup
- Training
- Production Support

PLC Control Panel
